## Exlusive to the new Bizhub i series

Having complete protection against virus threats gives you the peace of mind to focus on other tasks. So to protect your data, the optional BitDefender anit-virus engine automatically scans all transmitted and received data - In real time. You can also run on-demand or scheduled scanning of your data, to make sure you stay protected.

CELEBRATING 25 YEARS SINCE 1991

## Rise of renewable power

Konica Minolta is constantly striving towards environmental sustainability which has been seen with their Clean Planet program to monitor cartridge and toner wastage as well as their ISO 14001 certification (accredited third-party verification that provides a formal structure for environmental management). As of 2019 Konica Minolta is now listed in the 100 most sustainable companies in the world.

Renewable power is on the rise and its thought that by 2030, and even more so by 2050, the world will see the arrival of societies fuelled by renewable power that is not reliant on fossil fuels (one of the main sources of man-made CO2 emissions). Konica Minolta believes that quickly adapting to and running its business to align with the future form of energy use is a requirement of a company that can grow sustainably.

Here are some of the ways Konica Minolta have been working to achieve sustainability

### Eco Vision 2050 and Carbon Minus concept

With Eco Vision 2050, Konica Minolta aims to reduce CO2 emissions from its products throughout their entire life cycle by 80% compared to fiscal 2005 levels by 2050. The addition of "Carbon Minus" is a new commitment to achieve a CO2 emissions reduction effect that exceeds the CO2.

### RE 100

RE100, led by The Climate Group, is an intentional NPO focused on accelerating climate action, in partnership with CDP. It is made up of companies that are committed to procuring 100% of their electricity consumption from renewable sources.

### Chinas KM renewable production plant

Konica Minolta, Inc. announced that one of its MFP production sites in China, Konica Minolta Business Technologies, in Guangdong province, has achieved its goal of procuring 100% of the electricity it uses from renewable sources.

# Sustainability
## Impact for you

ethos imaging

CELEBRATING 25 YEARS SINCE 1991

## Monitor your footprint

With the goal of reducing wastage for a cleaner tomorrow, it is important that that effort is made on the consumers behalf as well as the manufacturers. Konica Minolta makes a strong effort to give its consumers the power to take that all important step towards a cleaner tomorrow.

The new i-Series consists of brand new eco settings, low temperature fusing toner and weight detection sensor which all combine to significantly reduce the consumption of energy and paper.

## Eco Calculator

If you are thinking of switching machine, simply enter the details of your current model, followed by the details of the new device you are considering.

The eco Calculator will give an percentage energy saving and kWh figure along with the $CO_2$ reductions and the money you can save by switching.

## XPS Print Preview

Konica Minolta's XPS Print Preview combines office efficiency and reduced TCO with eco-consciousness by reducing printing and toner waste caused by improper print setting. It displays a true-to-life image of the material to be printer on the computer screen with exact printing, hole punching and stapling positions to make test prints superfluous.

ethos imaging

CELEBRATING 25 YEARS SINCE 1993

**Implementing papercut MF is a simple, low-cost application that greatly improves efficiency by allowing you to take full control over your multi-functional devices. Papercut encourages responsibility and makes users and departments accountable for their print usage.**

PaperCut

## Find me printing

This solves the problem of finding the closest printer from a long list of available printers.

Simply print to a global virtual queue, then go to a print release station and print the job.

## Professional client billing

Users may allocate printing expenses to shared accounts using pop-up client software.

This is specifically designed to suit organisations like schools, colleges and universities in which teachers and students must account for their print usage.

## Web print

Unique, industry-leading solution to manage the growing need for printing from laptops and wireless devices by anonymous users.

It enables printing from user-owned devices without the overhead of installing printer drivers and managing server authentication.

KONICA MINOLTA                    4                    **Authorised Dealer Since 1997**

# Improve your efficiency

Document Navigator is a simple and flexible capture solution that will manage your document process. Scanning, processing and delivering documents can involve a lot of manual work for one document. With Document Navigator all your document based daily office procedures can be done for you.

## DOCUMENT NAVIGATOR

### Document Capture

Data can be captured from various sources, including Konica Minolta devices with OpenAPI, desktop computers via the desktop client, e-mails received by a registered e-mail server, databases, FTP servers, and Windows folders monitored by Document Navigator.

### Document Processing

Textual content is recognised in electronic and paper documents and transformed into editable, extractable or searchable content.

Automatic conversion into the most popular electronic formats is supported, including Word, Excel, PDF, sPDF, JPEG, TIFF, XML, PDF/A.

### Document Distribution

Scanned documents are delivered into the desired network folders, which can be selected on the MFP panel or are automatically addressed according to the workflow specifications.

Documents can also be stored in Cloud environments, including Sharepoint, Google Drive, Windream or Docuware.

## Lease or buy outright?

Or course, the obvious benefit to leasing over purchasing is the conservation of capital and  lending facilities. Maintaining a positive cash flow and retaining access to loan facilities is more important  than ever in these uncertain times, particularly as most banks have restricted their lending and overdraft facilities. However, with many different types of leasing arrangements on the market, which one is right for you? This will depend on how your needs are likely to change over the period of the agreement for example;

- Is your usage unpredictable or likely to grow?
- Will you want to benefit from advances in technology?
- Will you want to own the equipment at the end agreement?

## Which type of Lease agreement?

For each type of lease, we outline the advantages and disadvantages, and the right circumstances we feel this type of lease would best be suited.

## Fixed Term Lease

With this type of agreement, the lease expires at the end of the term shown in the agreement, usually shown in number of months. There is no option to continue for a further period, only to upgrade or return the equipment. The equipment belongs to the lease company at the end of the term, and title may be offered to you for a fee, but this would need to be clarified at the outset. This type is "on balance sheet". Suitable if you know that you will want to replace or no longer need the equipment at the end of the term. Service is usually charged separately.

## Minimum Term Lease

This agreement offers you the option to continue the agreement at the end of the minimum term on a quarterly basis, with the ability to cancel with 90 days notice. Flexible agreement if you know that you may want to continue for a period at the end of the the minimum term. You must remember to give 90 day notice to cancel when you want to end the agreement. Equipment belongs to the lease company at the end of the term. This type is "on balance sheet". Service is usually charged separately.

# Finance Options

## Lease Purchase Agreement

With a lease purchase you are buying the equipment over an agreed period of time. The full VAT amount is usually paid up front and ownership of the equipment passing to you at the end of the term. Useful if you know the equipment is not going to be overused during the period of the agreement and the technology is still going to be suitable for your needs. Different tax rules apply, check with your accountant for latest rules on writing down allowances etc.

## Total Volume Rental Agreements

This is a more complex agreement but in the right circumstances provides a flexible cost effective solution. Whereas a standard agreement is for an agreed number of months, the Total Volume Agreement is based on an agreed number of pages. The per page cost includes all servicing and supplies (usually excluding paper) and of course the capital cost of the equipment. The benefit of this type of agreement is that should the usage of the equipment increase dramatically, the agreement simply comes to an end earlier, allowing the equipment to be replaced. The danger of a standard type of lease in this situation is that the equipment may have reached the end of it's useful life, but the lease has not yet come to the end of the term, making an upgrade costly. The important aspect to keep in mind is that you will need to monitor your usage over the agreement. You do not want to be in a situation where the agreement is for an amount of prints that you are not achieving. Fortunately the agreement allows for an adjustment of the agreed volume. In addition, the agreement will enable you to keep the equipment for a maximum of one year after the end of the term, allowing you the time required to complete the number of copies included within the original agreement.
